

Sports Park and Recreation Center ***(Currently Underway)***

Multiple consultant services are essential to the development and delivery of the Sports Park and Recreation Center project. The City Council awarded three consultant services contracts that will identify and establish accurate surveying and mapping, geotechnical and grading, and drainage for the Sports Park prior to initiating designs that implement the Master Plan. Below are the project schedules for these consultant services and initiating design services:

Sports Park Surveying and Mapping

On October 20, 2009, the City Council awarded a consultant contract to Mayer & Associates for surveying and mapping services. Aerial, topographic, and boundary maps have been completed. The remaining services expected later this calendar year include a potential lot line adjustment.

Sports Park Geotechnical

On September 1, 2009, the City Council awarded a consultant contract to Lawson Geotechnical Consulting (LGC) to perform geotechnical investigations at the Sports Park site. Field work has been completed and a final report has been prepared. The LGC contract includes inspection during the Sports Park grading.

Sports Park Grading and Drainage

On October 20, 2009, the City Council awarded a consultant contract to Psomas for grading and drainage design services. The progress of the design process is contingent upon completion of the Environmental Impact Review certification. Staff anticipates final design to be completed in April 2011.
